Creating regional funds would allow lender of last resort to redede its role

As the world economy continues to recover, the International Monetary Fund has become a key player in managing the global approach to crises.

The point is particularly pertinent now, given the growing political and economic tensions in some countries. The fund has played a critical role in fostering efforts to address those tensions.

The fund has now reached parity with the European Union and other international organizations in its role as a lender of last resort.

The fund has also played a key role in addressing the global financial crisis and helping to reduce its impact on the world economy.

As a result, the fund has become a key player in managing the global approach to crises.
